SUMMARY

Growth marketer and founder who scaled a D2C brand to 15L+ revenue in 6 months at 5X ROAS on 2L+ Meta ad spend. Experienced in performance marketing, A/B testing, retention systems, and AI-powered creative production. Built and shipped multiple AI tools independently.

EDUCATION

Christ University, Bangalore, KA

May 2026

Bachelors of Business Administration (BBA) Honours in Business Analytics

Relevant Coursework: R Programming, Python, Economics, Statistics

WORK EXPERIENCE

Tata Digital, Marketing Intern

Apr 2025 – Jun 2025

- Analysed behavioural cohorts to design targeted push notification campaigns aimed at improving user re-engagement and retention
- Performed regression analysis on customer transaction data to uncover repeat purchase drivers and optimise lifecycle targeting strategies
- Synthesised campaign performance metrics into monthly business review decks, delivering actionable insights to senior leadership

Big Bills (Clothing Brand), Founder

May 2024 – Apr 2025

- Scaled brand to ₹15L+ revenue with a 20% net profit margin
- Achieved 5X ROAS on ₹2L+ Meta ad spend through performance marketing across cold, retargeting, and lookalike campaigns
- Produced AI-generated ad creatives achieving 2%+ CTR, outperforming Meta industry average of ~1%
- Built and automated email marketing flows; increased customer LTV by 15% and drove repeat purchase behaviour
- Used Shopify analytics and Google Analytics to identify funnel drop-off points and optimize the purchase journey

Rapid Racing, Administrator

Mar 2021 – Jun 2022

- Grew F1 motorsport page to 20K followers organically with a 10%+ engagement rate, significantly above the Instagram industry average of 1-3%
- Monetised via brand partnerships, negotiating and closing deals directly with sponsors
- Acquired by one of the largest F1 pages on Instagram

PROJECTS

[Viral AI Ad for Go Zero](#) (D2C Ice Cream Brand)

- Produced an AI-generated video advertisement for Go Zero using AI creative workflows, generating 50K+ organic views, 500+ LinkedIn engagements, and a 60% average watch time.

[AI Suit Visualiser](#) | Virtual Try-On Application

- Built an AI-powered virtual try-on application using Claude and Emergent to generate personalised suit mockups from user-uploaded photos and style inputs.
